

## “Staying Ahead of the Energy Scenarios” Conference

### Banpu CEO gives his view on investment potential in the Energy Industry

To explore global and regional energy scenarios over the next 25-40 years and to seek options of alternative/ renewable energy sources available to beat the new threat to economies and businesses, the international conference on “Staying Ahead of the Energy Scenarios” was organized on November 11, 2005 by The Nation Newspapers. Top executives of leading regional and global energy companies and distinguished officers from government agencies across the globe have shared their valuable views on the global scenarios and implications of energy, investing for the future and new source of energy to more than 500 professionals from energy and related industries, foreign embassies, commercial and finance sections.

Mr. Chanin Vongkusolkit, CEO of Banpu Public Company Limited, is one of the speakers of this conference. He has addressed on the topic “Investment Potential in the Energy Industry” by pointing out the importance of coal & power generation businesses, clean coal technology and growth potential for energies companies.
