The Chairman requested Mrs. Somruedee Chaimongkol, Chief Executive Officer, to explain the details of the other Company's performance to the Meeting.

The 2022 Coal Industry in Review

Coal Price Index: The Newcastle Export Index (NEX) for January 2023 - 17 March 2023

The coal price has risen above the level of more than US\$400 per ton. This was driven by concerns over tight global coal supply according to the tensions between Russia and Ukraine.

The first quarter of this year, the price of coal has decreased, as of March 31, 2023, at a price of US\$183 per ton.

Henry Hub Natural Gas Price for January 2023 - 17 March 2023

The Henry Hub Natural Gas Price index rose more than US\$8 per million BTU in 2022 from the factors of tension between Russia and Ukraine and sanctions on Russia including the demand for natural gas. Currently, the price of natural gas has decreased due to the decrease in demand after the end of winter together with reducing concerns about the overall economy.

There was also a fire at the main Freeport gas export terminal that had to be shut down for more than eight months for maintenance. Gas exports are expected to resume normally in April 2023. This will affect the appropriate level of natural gas prices.

2022 Performance and Long-Term Strategy

1. Business diversification - moving forward to cleaner energy – invest in the natural gas business, electric business, renewable energy and expanding the energy technology business through Banpu Next Co., Ltd., which focus on expanding the business and Banpu's ecosystem.
2. Geographic diversification - expanding business to other countries in the Pan Asia Pacific and increasing investment in the natural gas business in the United States of America.

Banpu has been able to honor its commitment to ensuring sustainable energy supplies that are reliable, affordable and eco-friendly. As a leading international versatile energy provider, Banpu has a duty to supply energy both now and in the decades to come.

Banpu's core business

Energy Resources

Natural Gas business

BKV, acquired upstream and midstream assets in the North Texas Shale for \$US 750 million, reinforcing Banpu's position as one of the top 20 gas-weighted natural gas producers in the U.S. market. This acquisition will increase Banpu's gas net production to 864 MMcfd.

BKV entered a definitive agreement with EnLink Midstream to develop a Carbon Capture, Utilization and Storage (CCUS) project in the Barnett Shale region of North Texas. This strategic partnership is designed to mitigate carbon dioxide emissions from BKV's owned and operated upstream businesses in alignment with Banpu's commitment to achieve Net Zero scope 1 and 2 emissions from BKV's owned and operated upstream businesses by 2025.

Mining business

Coal mining business Located in coal exporting countries such as Australia, Indonesia and countries with continuous high demand Such as China, with a total production capacity of 35.4 million tons in 2022. Banpu focus on delivering high quality coal to customers with plans to bring clean energy such as solar energy and battery energy storage systems to improve operational efficiency.

Power business

The power generation business group currently has a total capacity of approximately 4.0 gigawatts, of which 3.3 gigawatts are from conventional fuel power plants and 0.6 gigawatts of renewable energy.

The Company's assets are high-efficiency power plants . The power plant utilizes High Efficiency, Lower Emissions (HELE) technology. The assets in the portfolio are balanced between Power plants with long-term power purchase agreements (PPAs), such as BLCP power plants (BLCP) or Hongsa power plants which are stable in generating income and cash flow while we enter into short-term trading contracts with Power plants with modern technology, such as natural gas power plants in the United States. Including renewable energy businesses such as solar power plants and wind power plants.

Energy Technology business

1. Banpu is now engaged in 20 smart city projects
2. Energy Trading business in Japan , trading through a central system platform and also looking for opportunity to expand this business to other countries.
3. Banpu NEXT, Thailand's first fully integrated alternative mobility service provider in the form of Mobility as a Service (MaaS), aspires to promote promising Thai startups operating in the travel and smart mobility sectors.
 - Mobility Sharing - The car rental service via application is safe and convenient. Booking can be done 24 hours a day with a few simple steps on HAUP mobile application.
 - Ride Sharing - the "MuvMi" application to provide an on-demand ride-sharing service
 - Fleet & Charger Management, and after-sales services
4. Solar Rooftop & Floating Solutions Business- Equity-based Capacity 205MW.
5. Under Banpu NEXT, Banpu partnered with Cherdchai Motor Sales and Durapower to develop a lithium-ion (Li-ion) battery assembly plant for electrical buses in Thailand, which will become operational in 2023 and to expand production capacity to 1 GWh by 2026. Furthermore, with a view to scaling-up its battery business and ESS value chain, Banpu NEXT has acquired more shares in Durapower, increasing its stake in the company from 47.68% to 65.1%. Banpu NEXT currently has a 1.0 GWh Li-ion capacity with plans to expand to 3.75 GWh by 2025.

Banpu Strategy 2023-2025

Banpu focuses on generating strong cash flow and maintain business efficiency through financial strategy. The main source of funding comes from 3 parts.

- 1.) The business operation that can continuously generate stable cash flow
- 2.) Fund received from the capital increase (The exercise of BANPU-W5 warrants is scheduled to be exercised in September this year.)
- 3.) Issuance of debentures (rating A+), reflecting stable business prospects and strong financial status.

From this year to 2025, the company plans to allocate approximately US\$ 900 million in investments. It will only be invested in Greener businesses, with 40% focused on businesses related to the natural gas value chain in the United States of America and natural gas power plants. Another 60 percent will focus on investments in renewable energy and energy technology. We commit to expand the sustainable energy portfolio that is environmentally friendly under the Greener, Smarter strategy.

The main strategies are as follows :

- 1) Energy Resources Business Group : Committed to driving towards a low-carbon society by the natural gas business in the USA, having a clear goal to reduce carbon dioxide emissions to become Net zero.
- 2) Energy or electricity generation business group: Paying attention to maintenance and increasing efficiency to the operating power plants along with reducing emission levels and aiming to expand the production capacity of both HELE power plants, renewable energy, looking for additional investment opportunities in strategic countries where Banpu is already operating in order to increase the value of the power business to cover the entire value chain.
- 3) Energy Technology Business Group : Conducting business through investment in Banpu Next Co., Ltd., which aims to be a fully integrated energy provider, Net Zero, aiming to create exponential growth and increase business value along the value chain.

Ms. Arisara Sakulkaravek explained to the Meeting the details of the balance sheet and the profit and loss statements for the year 2022, which was audited and signed by Ms. Rodjanart Banyatananusard of C.P.A. No. 8435, the auditor from PricewaterhouseCoopers ABAS ("PwC").

Total assets of \$US 12,638 million, increased by \$US 1,692 million compared to total assets as of 31 December 2020 , increased by 15% derived from :

- Cash and cash equivalents of US\$ 970 million and an increase in Property, plant and equipment US\$ 774 million was mainly from acquisitions during the year in the amount of US\$ 955 million (New gas field, North Texas Shale: XTO project in the USA and renewable energy power plants in Vietnam)
- Offset by a reduction in coal mining rights of US\$ 400 million from the allowance for impairment losses of a mine in Mongolia.

Total Liabilities of US\$ 8,229 million, an increase of US\$ 386 million was mainly due to the business normal operation.

Shareholders' equity of US\$ 4,409 million, an increase of US\$ 1,306 million or 42% was mainly due to:

- An increase of US\$ 1,162 million from 2022 net profits.
- An increase of US\$ 223 from additional paid-up share capital.
- A decrease of US\$ 346 million from the effects of foreign exchange rate translation of subsidiaries' financial statements and others.

The details of balance sheet and the profit and loss statements as per the annual report for year 2022

Sales reported at US\$ 7,693 million, increased by US\$ 3,569 million compared to 2021. The main factor is the rising market prices of commodities. Banpu Group's weighted average coal selling price was US\$ 168 per ton in 2022 compared to US\$ 91 per ton in 2021.

Gross profit margin of the year representing 53 %, an increase of 11% compared to the previous year.

Administrative expenses reported US\$417 million, increased by US\$113 million or 37% was mainly from administrative expense resulting from business expansion in USA and from the power plants that were acquired by the group in 2021.

Other revenues reported US\$ 441 million , an increase of US\$ 300 million came from the divestment of Sunseap Group Pte. Ltd. (Sunseap) in the amount of US\$ 179 million and a profit from the gas business of the XTO project in the amount of US\$ 171 million.

Other expenses of US\$ 1,182 million was mainly due to, the realized loss from financial derivatives derived from coal swap contracts of US\$134 million, natural gas swap contracts of US\$600 million and the impairment loss on assets of US\$375 million was a provision for the impairment loss of one coal mine under development (Altai Nuurs) in Mongolia because the public transportation infrastructure that is necessary for project developing and commercial operating did not progress as planned.

Profit sharing from joint ventures and associates reported at US\$339 million, increased by US\$112 million compared to 2021.

Net profit reported of US\$1,162 million , increased by US\$858 million.

EBITDA of \$US 3,916 million significantly improved by 120% from previous year.

The Chairman invited the shareholders to ask questions or raise their observations.

1. Mr Rawipat Chintakasikam, a shareholder, submitted a question in advance to ask about a plan to manage the ratio of earnings and profits in the following three business groups, namely, (1) energy resources; (2) power generations; and (3) energy technology within the next three to five years.
 - Ms. Somruedee Chaimongkol clarified that Banpu had been trying to increase its cashflow ratio from the clean energy business. Between 2023-2025, Banpu is planning to invest 40% to expand its growth in the US gas supply chain. The remaining 60% will be spent in the energy technology and renewable energy businesses. (The 2023 investment budget is around US\$900 million).
2. Mr Rawipat Chintakasikam, a shareholder submitting his question in advance, asked if Banpu has planned to expand its natural gas business, which it currently invests in the US, to Russia.

- Ms. Somruedee Chaimongkol answered that Banpu had no plan in the meantime to expand its natural gas business to Russia.
3. Mr Rawipat Chintakasikam, a shareholder submitting his question in advance, asked about an impact of a possible war between US and Ukraine and Banpu's risk mitigation from this potential circumstance.
- Ms Somruedee Chaimongkol stated that during a war that may ignite an energy crisis, Banpu focuses on risk management. Yet, we still see an opportunity in rising energy prices, which is a boon for the energy business and for Banpu itself. Banpu has implemented the Business Continuity Management System (BCMS) where a business continuity plan (BCP) has been clearly established so that the company is ready in time for emerging emergency & crisis.
4. Ms Pornthip Kitichaiwat, an authorized representative from the Thai Investors Association, submitted a question in advance to ask about Banpu's future investment plan.
- Ms Somruedee Chaimongkol explained that Banpu has set a production capacity growth target where its total productivity is expected to reach 6,100 MW within 2025. It also plans to allocate 40% of its investment budget for expansion in the US gas supply chain and another 60% in the energy technology and renewable energy businesses. (Total investment budget for 2023 is set at around US\$900 million).

5. Ms Pornthip Kitichaiwat, an authorized representative from the Thai Investors Association, submitted this question in advance to ask about a possible impact of higher interest rates to Banpu's operation and how the company plans to manage this risk.
 - Ms Arisara Sakulkarawek explained that to minimize risk, Banpu has carefully reviewed and chosen sources of fund with reasonable costs. It also reduces its debts and looks for leverage tools to minimize its interest rate hike exposure.

6. Mr Piyapong Prasarthong, a shareholder, asked about an ongoing war situation between Russia and Ukraine that led to the energy crisis in Europe. He also touched upon the trade and economic boycott imposed by the US and the EU against Russia and asked what impacts Banpu has been exposed to as a result of the situation.
 - Ms Somruedee Chaimongkol answered that in a war situation that may lead to the energy crisis, Banpu is focusing on risk management of, for example, production process, delivery and hiking oil prices. However, higher energy prices benefit the energy business and Banpu. At the moment, adjustment is going on, as many countries are increasing their interest rates, which drives energy prices down. This however does not yet affect our operation.

7. Mr Nakorn Leongruangthong, a shareholder, asked about an assumed breakeven sales price of gas for the gas business that Banpu has acquired in the US.

- Ms Somruedee Chaimongkol explained that gas sales prices are mainly determined by market conditions.

Banpu has invested in the gas business since 2014. We were able to benefit from low at-cost prices during our past three investments, which greatly contributed to the setting of our sales prices.
8. Mr Watson Pongwarapa, a proxy, asked if the Indonesian mine would be set aside for a provision for the impairment loss.
- Ms Somruedee Chaimongkol explained that Banpu had no plan to do that for its Indonesian mine because the business is actually in balance and can very well take care of itself.
9. Mr Surapong Surabotsopon, a shareholder, asked if the coal to tar & coal to petrochemical projects were considered a greener and smarter move. If not, he asked if Banpu was still interested in investing in the projects. He also asked why it took so long for Banpu to operate the pilot project.
- Ms Somruedee Chaimongkol explained that this project involved a truly new technology and therefore was capital-intensive. Banpu needed to thoroughly study the possibility and was vigilant in allocating a proper portion of investment into the project. That's why the pilot project took a long time.

Although products from this business cannot yet be clearly defined whether they are coming from a green business or not, if Banpu can clearly explain its work plan and its commitment to a greener, smarter business while the business itself can add value to both Banpu and our shareholders, we will invest in this business. Having said that, Banpu will keep shareholders posted periodically of the project's progress.

10. Mr Bandit Nukornworarat, a shareholder, asked for a reason behind the amortization and impairment of Banpu's business in Mongolia.

- Ms Somruedee Chaimongkol explained that the impairment of the Altai Nuurs in Mongolia was due to limited transportation infrastructure required for project development, which impeded the project from a planned commercial operation. As the project requires more time to develop and therefore may indefinitely delay the recognition of its returns on investment, Banpu therefore decides to suspend the project development.

11. Ms Suwannee Cheersirikraiwit, a shareholder, asked about coal prices Banpu has set for advanced sales and what percentage of coal was subject to this price.

- Ms Somruedee Chaimongkol explained that Banpu had no hedging sales of coal. While about 40% of coal that Banpu sells has its price set in advance, the actual sales however are physical.

12. Ms Suwannee Cheersirikraiwit, a shareholder, asked if Banpu would set a provision for impairment of other assets of its own.

- Ms Somruedee Chaimongkol answered that currently, there was no plan to there was no plan to amortize or impair other assets.

13. Ms Suwannee Cheersirikraiwit, a shareholder, asked about Banpu's goal for its investment in Banpu Next Co Ltd, with a particular focus on electric vehicles or battery.

- Ms Somruedee Chaimongkol explained that Banpu commits in supporting Banpu Next as evidenced in its additional investment in the battery business to increase its ratio in Durapower. Banpu views that battery is essential to establish stability in the renewable energy power plant, which is the energy of the future. It also plans to continue investing in the EV business.
14. Mr Surapong Surabotsopon, a shareholder, asked why Banpu did not sell Altai Nurs instead rather than than impairing it.
- Ms Somruedee Chaimongkol explained that currently, the global economy and that of Mongolia remain weakening. There is no potential buyer. That's why a provision for impairment loss is made to reflect Banpu's actual financial condition.
15. Mr Surapong Surabotsopon, a shareholder, asked why there was no sales at all for the e-ferry business during the past three years.
- Ms Somruedee Chaimongkol answered that e-ferry was mainly for tourism and domestic travel purposes. During the past three years, the Thai tourism industry was harshly hit by Covid-19. With the industry bouncing back at the moment, we hope it will benefit this business.
16. Mr Somsak Prommoon, a shareholder, asked if the impairment loss of Banpu's mine in Mongolia had reached the full amount. He asked if there would be another impairment loss provision for this mine in the future. He also

inquired if the XTO gas field that Banpu had recently bought would be subject to impairment as well. He asked how Banpu's last-year investment in the healthcare business was.

- Ms Somruedee Chaimongkol explained that explained that the impairment loss provision for the Mongolia mine had been to its full amount. There is no plan for impairment of Banpu's XTO gas field. The healthcare business that it has invested does yield a good return.

17. Ms Suwannee Cheersirikraiuit, a shareholder, asked for the total value of long-term debentures issued so far by Banpu and their average interest rates.

- Ms Arisara Sakulkarawek answered that Banpu had issued a total of Baht 84.2 billion worth of debentures at an average coupon rate of 3%.

The Chairman invited the shareholders to ask questions or raise their observations. No questions being raised.

The Chairman, then, requested the Meeting to acknowledge the Board of Directors' One Report on the Company's operation and to approve the audited statements of financial position and Statement of Income for the Year ended on December 31, 2022.

Meeting Resolution

After due consideration, the Meeting passed a resolution to acknowledge the Board of Directors' One Report on the Company's operation and to approve the audited statements of financial position and Statement of Income for the Year ended on December 31, 2022 with the majority voting as follows:

Resolution	Total Votes (1 share = 1 vote)	Per cent of the total votes
1. Approved	3,176,775,897	99.9750
2. Objected	794,300	0.0250
3. Abstained	83,562,167	

Agenda 3. To approve the distribution of annual profits and annual dividend payment

The Chairman requested Ms. Arisara Sakulkaravek, the Chief Executive Officer, to explain this agenda to the Meeting.

Ms. Arisara Sakulkaravek, advised the Under Section 116 of the Public Limited Company Act, B.E. 2535 (1992), the Company is required to set aside as a legal reserve at least 5% of its net profit after accumulated deficit brought forward (if any) until the reserve is not less than 10% of the registered capital of the Company.

According to the Company increased the registered capital in 2022, there is required the additional legal reserve in the amount of Baht 168,805,270.20.

The Company's dividend payment policy to the Meeting as follows:

“The Company will pay dividend at a rate approximate to 50 per cent of the net profits of the consolidated accounts after provisioning all statutory reserves, provided that the rate of dividend payment will be subject to cash flows and investment plans of the Company and its subsidiaries, as well as regulatory restrictions and other requirements.”

In addition, the policy of the Company on dividend payment is that the dividend shall be distributed to shareholders upon the following requirements being met:

1. The performance of the Company is positive.
2. No retained loss exists.
3. Cash flow is sufficiently available for the dividend payment.
4. The dividend payment is subject to company's investments

In this year, the performance of the Company is positive. In addition, the Company has sufficient cash flow to pay dividends which dividend payment has consistent with the dividend policy. Taking into account of the various investment projects, the Board considered that the Company should appropriate the annual profits to pay the annual dividend at the rate of 1.20 Baht per share, which is the annual dividend for the period during 1 January 2022 – 31 December 2022 of which 0.45 Baht was paid as interim dividend on September 30, 2022.

Thus, the remaining 0.75 Baht dividend for 2022 performance would be further paid out of the retained earnings as of 31 December 31, 2022. The dividends will be payable to the shareholders whose names appear on the Record

Date as of April 11, 2023. The dividends payment would be appropriated from the corporate income tax – exempted profit on which shareholders are not entitled to tax credits. The dividend payment would be made on April 28, 2023.

The Chairman invited the shareholders to ask questions or raise their observations.

1. Mr Udon Rojratchaneekorn, a shareholder, inquired about this year's dividend payout ratio. He also asked to what percentage the statutory reserves accounted for Banpu's net profit and whether the statutory reserves would likely increase in 2023.
 - Ms Arisara Sakulkarawek answered that the payout ratio this year was 23%. As for the statutory reserves, Banpu is required to allocate no less than 5% of its annual net profit as reserves until the amount is no less than 10% of its registered capital. So far, Banpu has reached 100% of the required threshold. In 2023 however, Banpu will have to set aside more statutory reserves because of increasing registered capital anticipated from the rights exercise of Banpu-W5 in late 2023.
2. Mr Thanachit Tangsuksan, a shareholder, asked about the criteria for Banpu's cash allocation. Cash is now as high as Baht 74.448 billion as of end of 2022. In addition, he said there would be additional cash coming in from the conversion of Banpu-W5 in the near future. He asked about Banpu's plan to manage this cash.
 - Ms Arisara Sakulkarawek explained that additional cash from operation activity will be partially invested to capture good returns. Another part will be used to repay loans to reduce loan burden and minimize Banpu's exposure from higher loan interests.

3. Mr Nakorn Leongruangthong, Mr Bandit Nukornnawarat, Mr Thanachit Tangsuksan and Mr Watcharin Lertchanaponchai, shareholders, asked why the payout ratio was lower than the 50% payout ratio of Banpu's consolidated net profit stated in its dividend payment policy.
- Ms Somruedee Chaimongkol explained that Banpu had prioritized long-term healthy returns to shareholders and investors. Even in years when Banpu suffers losses or low profits, shareholders are still paid dividends from its cashflow. Banpu has allocated higher cashflow from its 2022 operation results to dividend payment. This however is determined to reflect a balance with its investment plans based on the greener, smarter strategy already presented to shareholders. In this regard, Banpu needs to invest a lot of cash. It also needs to repay debts to lower its loans in a move to minimize its interest risk exposure. Besides, there remains a need to hold cash in today's economic slow-down conditions while exchange rates and commodity prices are volatile.

The Chairman invited the shareholders to ask questions or raise their observations. No questions being raised.

The Chairman, then, requested the Meeting to approve the distribution of annual profits and annual dividend payment.

The Chairman, then, requested the Meeting to approve the amendment of the Articles of Association of the Company as proposed, and empower the authorized directors of the Company or person(s) appointed by the authorized directors to make any amendments per suggestions or opinions of the registrar or any other relevant authority.

Meeting Resolution

After due consideration, the Meeting passed a resolution to approve the amendment of the Articles of Association of the Company as proposed with the voting not less than three-fourths of the total votes of shareholders attending of the meeting and having the right to vote pursuant to Section 31 of the Public Limited Company Act B.E. 2535 as follows:

Resolution	Total Votes (1 share = 1 vote)	Per cent of the total votes
1. Approved	3,197,865,469	97.8155
2. Objected	621,808	0.0190
3. Abstained	70,795,188	2.1655

Agenda 8 Others (if any)

The Chairman invited the shareholders to ask questions and voice their additional observations.

1. Mr Chanchai Laohapongpaisan, a shareholder, submitted a question relating to the Mongolian mine where impairment loss had already been made. He asked if the mine could be re-opened, or if the concession had already been expired.
 - Ms Somruedee Chaimongkol explained that within the next two to three years, it was highly unlikely that the Mongolia Mine would break even. Banpu therefore will not re-start its operation. Nor will it extend the mine's concession when expired.

2. Mr Surapong Surabotsopon, a shareholder, asked about the progress in Banpu's investment in the strategic mineral project.

- Ms Somruedee Chaimongkol explained that Banpu had established a specialized unit consisting of experts in various fields from geology to engineering and business development to oversee the strategic mineral project. The team has periodically updated the Investment Committee.

3. Mr Prasit Suesatayasin, a shareholder, asked about Banpu's business goal in the new energy technology.

- Ms Somruedee Chaimongkol explained that Banpu set a goal to expand the energy technology business by twofolds in 2022 through five businesses that it has invested via Banpu Next as elaborated in its greener, smarter strategy. Details are as follows.

Business	As of December 31,2022	Target 2025
Solar Rooftop & Floating Solutions Business	205 MW	500 MW
Energy Storage Systems		
- Durapower	1.0 GWh	3.0 GWh
- Battery Assembly Plant	On process	0.75 GWh
E-Mobility		
- Passengers/day	5,800	430,000
- Unit (EV)	434	5,500+
- Stations	326	2,000
- Unit (E-ferry)	1	100
Smart City & Energy Management Business	20 Projects	30 Projects
Energy Trading Business	1,719 GWh	2,000 GWh

4. Mr Prasit Suesatayasin, a shareholder, asked about this year's Capex. In particular, he asked about the ratio between maintenance Capex and investment Capex.
 - Ms Somruedee Chaimongkol explained that Banpu had allocated 15% (around US\$35-50 million) as maintenance Capex and another US\$900 million as investment Capex to the gas, energy technology, renewable energy and new businesses.

5. Mr Prasit Suesatayasin, a shareholder, asked about a ceiling of Banpu's debts (with interest).
 - Ms Somruedee Chaimongkol explained that by underlining financial risk management, Banpu ensures that its debt to equity (D/E) ratio will not exceed 1-1.2 times.

6. Mr Prasit Suesatayasin, a shareholder, asked if BLCP Power Co Ltd would likely increase its production capacity from the existing level.
 - Ms Somruedee Chaimongkol explained that BLCP's production capacity is now at 1,400 MW, all of which is purchased by the Electricity Generating Authority of Thailand (EGAT). BLCP therefore can no longer increase its production capacity.

7. Ms Kulinchaya Temthanachote, a shareholder, asked if all documents mailed to shareholders can be converted into e-documents.

- Mr Wirat Wuthithanaset explained that as shareholders had approved to amend Banpu's Articles of Association in Agenda 7 to reflect the Public Limited Company Act, Banpu will be able to submit e-documents in the future, subject however to its compliance with the Stock Exchange of Thailand's (SET) regulations and other relevant laws and regulations.

The Chairman informed the Meeting that the Company would prepare the minutes of the Annual General Meeting of Shareholders for the year 2023 within 14 days from the date of the Meeting, which would be posted on the Company's website at www.banpu.com. The shareholders who would like to propose a material amendment of minutes of shareholders meeting, please inform the Company Secretary at bod_sec@banpu.co.th within 30 days after the dissemination.

The Chairman asked whether there was any question to be raised, but no shareholder raised any issue. Thus, the Chairman declared the meeting adjourned.

The meeting was adjourned at 16.20 hours
